#### Rebuild Rear Calipers

4	Dot 3 Brake Fluid	\$15.16	2	\$30.32
5	During the caliper rebuild, We noticed that the internal components have been rebuilt prior by another company, during the removal we noticed the internal function of the Rear E-brake was broken and was the main cause of the driver side caliper being seized. Upon further analysis noticed that the ratcheting mechanism was broken internally and could not be fixed.		1.5	\$315.00
<p>Sourced New Rear inner piston and ratcheting mechanism, Installed and recalibrated Ebrake Function.</p> <p>During brake bleed procedure, we noticed during brake force applied we found the brake pedal weak and losing pressure. Inspected Brake Booster and found that there was a very thin vacuum hose used during pressure is applied, vacuum hose would collapse and stop air from traveling from engine over to the brake booster.</p> <p>Replace vacuum hose and installed Brake booster vacuum hose</p> <p>Brakes operate the way they should.</p>				
6	Rear Inner Piston Ratcheting mechanism	\$384.00	1	\$384.00
7	Brake Booster Vacuum Hose 2 feet	\$20.62	1	\$20.62
Shop Supplies (3%): \$13.70		Tax (7.75%): \$41.84	<b>Total: \$2,071.41</b>
